```

then check changes on pinkynbrain.com

```
+-------------------------------------------------+
|                  For push on SSA                |
+-------------------------------------------------+
```

Step 1 change database credential in database.yml and push on origin

        git add .
        git commit -m 'change database credential for Pinkynbrain'
        git push origin master

Step 2 go to .ec2 directory

        cd ~/.ec2

Step 3 login with ssh
     copy & paste below command
        ssh -i matchmakr.pem ubuntu@54.191.223.150

Step 4 get sudo access

        sudo su

Step 5 Go to Project repository

        cd /var/www/project/lessons-matchmaker/

Step 6 Run bash file for load RVM

        . ~/.bash_profile

Step 7 Pull from git

        git pull origin master

Step 8 If you add any migration then run this else skip

        RAILS_ENV=production rake db:migrate

Step 9 final command

        touch tmp/restart.txt

then check app.singaporeswimming.com is running or not
we dont have credential so we can not check changes.
